

Title III Disbursement Claim Form

DESCRIPTION

1. **DJI Mavic 2 Zoom Drone** – More applicable drone for the Deep East Texas area. The camera on the Mavic 2 Zoom has telescope lenses meaning the camera can zoom in on an object. The camera can zoom two times (2x) with a 4K imaging or a zoom four times (4x) with 1080p imaging. The big benefit of the zoom is seeing an object clearly at 100-150 ft in the air which is about tree line height. The current drone (Phantom 4 Pro) is a great drone but does not have a zoom camera; therefore, the Phantom 4 Pro loses signal when try to get close on an object for a better picture for identification. Mavic 2 Zoom is one of the most utilized drones in our department and other LE Agencies for search and rescue.

1. Mavic 2 Zoom is compact (folds up) and portable
2. Flying time is 30-35 minutes
3. Very light drone
4. Very fast drone
5. Compact enough for flying in buildings (example: clearing out a building)
6. One of the quietest drones
7. Many flights pattern (tripod, follow, and draw)
8. Obstacle sensors (avoids obstacles)
9. Price \$1000-\$1100 range
10. \$1300-\$1500 for bundle (Includes extra batteries, car charger, extra propellers, and SD cards)
