tmaddox@co.sabine.tx.us

Dear Tom,

Thank you for allowing Vista Com to prepare a quotation for your recording solution. Vista Com has over a 25 year history of providing public safety recording solutions throughout the region. We partner with the best OEM's in the industry to delivery the latest technology to you and we back the solution with local support and factory engineering.

Within this quotation you will find three key areas that describe the solution.

- Hardware - this is the physical components to be installed at your site.
- Software - each solution requires software that is licensed to you for your recorder.
- Services - items that are one time charges and represent labor and support for your solution.

The link details all areas of your quotation that we have designed for you. This quotation is based upon given facts and knowledge of your requirements passed to us by you and your organization. As such if we determine that the environment is different than what we have designed we will promptly edit the proposal for your presentation.

Important Note - the point at which the recorder equipment connects to the customer equipment is referred to as the demarcation point. The customer and/or its vendors are responsible for any required connections to this demarcation point such as cabling, equipment programming, or equipment relocation.

If you approve of this quotation please indicate so within the link. By accepting this quotation you represent your authorization of your entity and legally bind your agency to the terms of this sales contract.

Kind Regards,

Robin Clevenger

Robin Clevenger
Regional Sales Manager
Vista Com

Vol 3-2 Page 539

Disclosures

All order cancellations are subject to a 35% restocking charge once order has been placed. Your solution is custom built for your environment. Vista Com will make every attempt to modify changes once purchase has been placed however the customer is ultimately responsible for any financial implications for order changes after the order is placed.

Solution Design - we make every attempt to ensure the attached quote is exact and matches your requirements. Please pay special attention to our description of goods and services to ensure it matches your requests. If Vista Com inspects your site location and determines that our solution does not match your communicated requirement, we will promptly revise this quote.

Customer Demarcations - The point at which the recording equipment is connected to the customer equipment is termed "demarcation point". The demarcation point can be a physical cable connection to a demarcation block or it can be a network cable connected to a customer network switch. Due to vendor and customer liabilities it is accepted that Vista Com is responsible for cabling and recorder connection from the demarcation point and the customer is responsible for all cabling, configuration, and coordination for recorded devices to the demarcation block.

Install Guide - Vista Com requires information about your network and user environment before installation of the recording solution. This information includes necessary information proprietary to the customer such as network addresses, user names/passwords, channel assignments and user rights. It is understood that the customer will answer this proprietary information to Vista Com prior to installation in order for the services to be conducted quickly and efficiently.

By acceptance of this offer you accept the disclosures above as part of this agreement.

VistaCOM

About Us

Vista Com is an authorized distributor, dealer, and service provider for industry leading operational recording solutions. We specialize in providing consultation, installation, and support. We are authorized dealers of Eventide, Revcord, Verint, Nice - Uptivity, Liberty, and Numonix call recording solutions. Our technicians are factory trained and available to ensure your products work as intended for years of reliable service.

Our company employees pride themselves in customer service. From sales to service we understand our customer needs first and strive to exceed expectations.

We stay abreast of technology and incorporate the best the industry has to offer in your solution. Our technicians work closely with our partners to ensure we are providing the best service for your application.

Our Solutions

We provide solutions to analyze spoken and visual interaction within your environment. From contact center to public safety, we equip you with hardware and software that enable you to review and improve the customer experience and optimize your operation. Our engineers integrate recording hardware within your technology environment and provide you with intuitive software to review your recordings. Our solutions enable you to reconstruct events, analyze and then react to these events in a productive manner.

- **Contact Centers**
- **Court and Interrogation**
- **Compliance**
- **Service**

Our solutions are backed by industry leaders in voice recording and digital video. Vista Com provides expert consultation on the most economically productive solution that closely matches your business flow ensuring minimal disruption to your operations while improving your customer experience.

Our Process

Vista Com believes in providing a strong pre-sale experience to ensure your solution is designed to surpass your call recording requirements. The key to a good integration is to determine the need. Some customers want basic call recording that will enable

them to easily retrieve call interactions with their company. Others want to be able to query this call data by caller ID, length of call, key words, etc. Then others want to understand what their

call center agents were viewing on their displays and software applications at the precise time a customer triggered some event. The key point is that a proper integration to accomplish the customer expectation must be met through a thorough understanding of how the solution will be used.

At Vista Com we employ a 5-step process that guides us through the customer solution. Each step is designed to interact with our customers to ensure the solution we are designing for you meets and exceeds your expectation. We wish for you to achieve the greatest value for your investment and not have to invest in a solution that you will not use or one that will under serve your organization.

System Design

Once the key inputs are gathered, we will begin designing a solution. Some examples of the key items we must know are:

- Type of phone trunks from your service provider to your PBX or phone system
- The type of PBX or phone system you have including the firmware revision level
- Where the system will be installed
- Archiving requirements, user access, security...

After we have the key inputs, we can then design a solution. If the particular application is complex or unique, we work very closely with our OEM's and alliances. There are literally 1000's of various scenarios that can be designed and by working as a team with our alliances we can quickly determine the best value for your application.

Support

Vista Com service personnel are employees of the company. This is important to us. We want to control the customer experience that you receive and put our service personnel through training de-signed to help us maintain the quality that you expect. Each service employee maintains the factory training required of our key alliances. This is often a yearly certification process. Call recording companies that rely upon outsourced service personnel may find it difficult to achieve the customer quality required and sometimes may be exposed to service personnel that may not be familiar with your solution or may not have the proper knowledge to quickly service the need.

What you can expect from Vista Com

- 24x7x365 toll free phone support—with warranty or maintenance plans, your solution will have access to our local service personnel any time.
- On-site service to fit your schedule
- Training programs specifically designed for your application and your personnel
- Extended maintenance programs—ensure you trouble free operation should you ever have an issue, need new training, or just desire a comfort knowing your system has factory coverage

Contact Us

Contact us and schedule a consultation. Vista Com sales personnel are trained to understand your recording needs and provide you with consultation and written quotes.

We often demonstrate the recording technology on-site at your locations. Give us a call to schedule a demo.

NexLOG™

**DX
SERIES™**

**Advanced Recording Solutions
for Mission-Critical Communications**

Recording Systems • Software Solutions • Edge Capture Devices

**NG9-1-1 • P25 Radio • DMR • IP Dispatch • ATC/ATM
Incident Reconstruction • Instant Recall • Mobile
Quality Assessment • Screen Recording • Reporting
VoIP • SIP • Digital • Analog • T1/E1 • ISDN • ED-137B/C**

*Eventide's mission-critical recording solutions are trusted
by organizations worldwide to capture, secure
and reconstruct their most important interactions.*

► **NexLog DX-Series Communications Recording Software and Solutions**

NexLog DX-Series™ recording solutions are the culmination of over 30 years of mission-critical recording experience. The DX-Series continues the NexLog tradition of reliability and ease-of-use while focusing on Digital Transformation (DX) to meet tomorrow's needs. With expanded solution architectures, as well as enhanced security, scalability and integrations, the NexLog DX-Series is truly the next generation recorder.

The NexLog DX-Series software includes multi-tier security and a web-based configuration management tool, as well as support for password policies, Active Directory, SNMP, TLS and AES-256 encryption.

The innovative *NexLog Access Bridge* option enables a scalable approach to enterprise deployments. Multiple recorders can be linked together for unified searching, replay, incident management and configuration.

NexLog 740 DX-Series™ Recording Solution

Channel Capacity*: 96 Analog, 96 Digital PBX, 192 T1, 240 E1, 560 VoIP, 240+ P25, 240+ DMR 3U Rack-Mountable

NexLog 840 DX-Series™ Recording Solution

Channel Capacity*: 240 Analog, 240 Digital PBX, 240 T1, 240 E1, 560 VoIP, 240+ P25, 240+ DMR 4U Rack-Mountable

Smart Edge Capture Device™

Captures, Buffers and Transfers to DX-Series Recording Solutions
Up to 24 Analog, 24 Digital, 48 T1, 60 E1 or 120 VoIP Channels. 1U

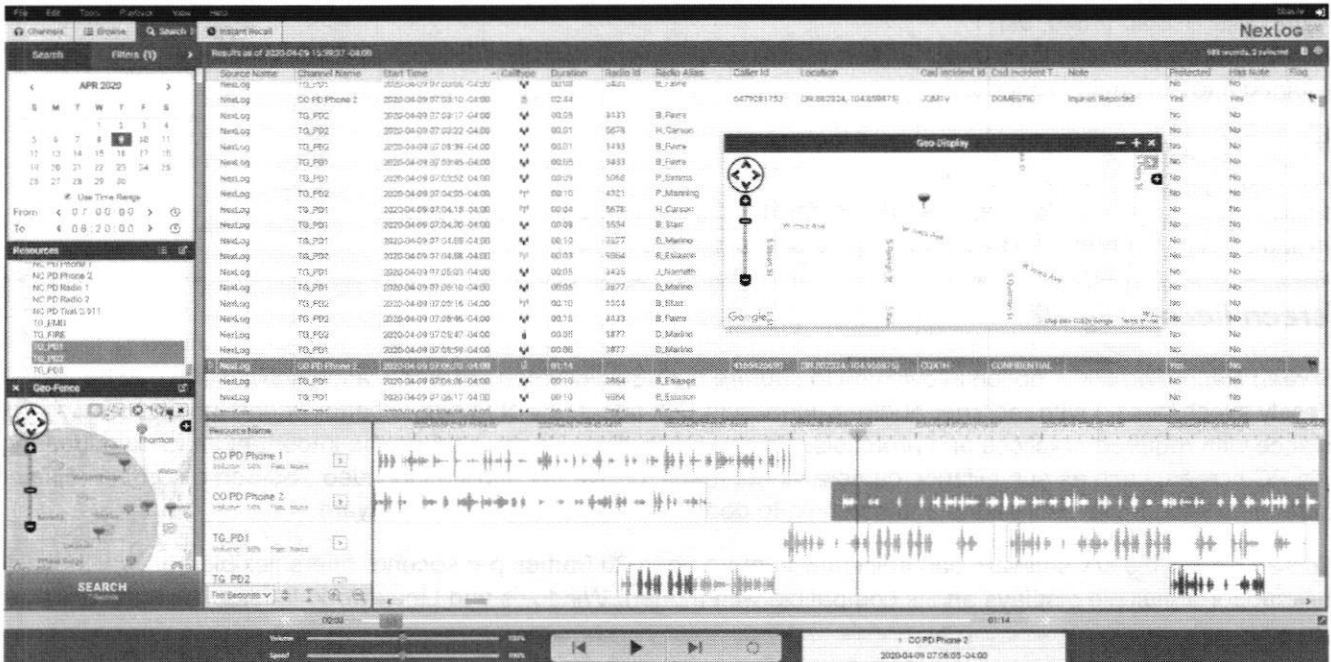

NexLog DX-Series™ Virtual Recording Software Solution

Channel Capacity*: 560 VoIP, 240+ P25. Add **DX-Series Smart Gateways** for Analog, Digital or Remote VoIP. Works with **ESXi**

► **MediaWorks DX Software: Incident Reconstruction, Instant Recall and More!**

The **MediaWorks DX™** software option provides secure access, replay and management of audio, screen, multimedia, text and TDD recordings. It is available via web browser on PCs, tablets and phones (using secure HTML5 technology) or as a native application on a PC. MediaWorks DX provides a complete set of tools to Browse, Search, Replay, Instant Recall, Live Monitor, Reconstruct Incidents, Protect, Export and much more.

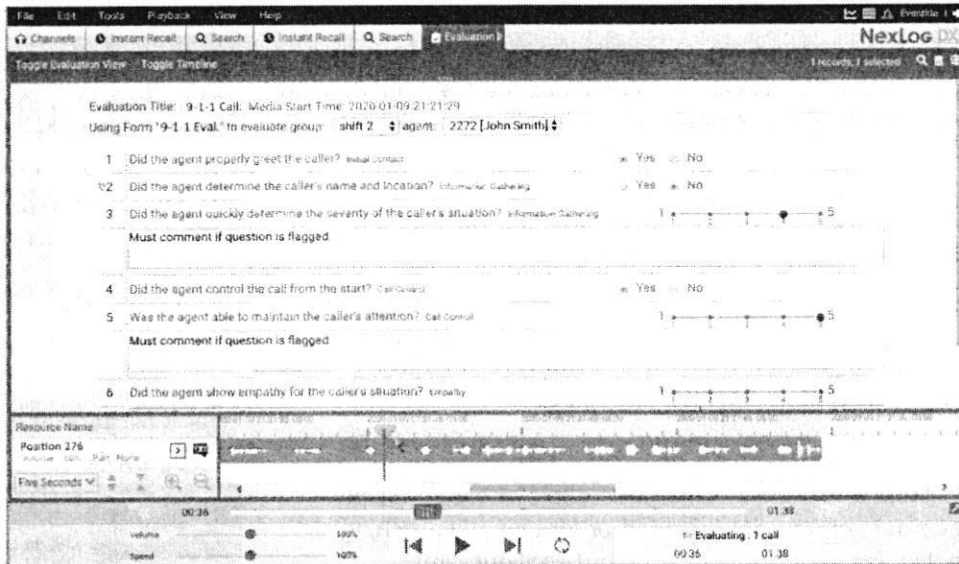

Capabilities include: Graphical Time-Line • Waveform Display • Talking Time and Date • Zoom In/Out • Loop Playback Skip Forward/Back • Playback AGC • Pitch-Corrected Variable Speed • Redact Audio • Obfuscate Audio • Audio Annotation • Text Annotation • Screen Replay • Text/SMS Replay • Multimedia Replay • Call Notes • Lock Recordings Protect Calls • Quarantine Recordings • Pop-Out Search Tools • Geo-Fence Search • Speech Search • Location Display** Location Tracking** • Multi-Parameter Search • Create Incident • Modify Incident • Attach Other Media • Split/Join Audio Clips • Restrict Access • Share Incident Folder • Pre-Set Exports • Menu Driven Export • Incident Export • Single and Multi-Recording Export • Export with Secure Standalone Player • Phone and Tablet Support • Multiple Monitor Support Configurable Layout • Dark Mode • Touch Screen Support • Accessibility Modes • Two Factor Authentication • Auditing • Upload videos and images to an incident for storage and replay***

► **Quality Factor DX Software: Integrated Quality Assessment and Reporting**

The *Quality Factor DX™* software option facilitates a quality assurance program to fit your agency's needs. With its built-in APCO/NENA QA/QI evaluation forms, you can quickly start measuring agent performance and help to protect your center from unwarranted conformance questions.

Quality Factor DX software includes a wide range of options for scoring, comments, notifications, scheduling, and reporting that can be selected to fit any agency. Add the optional *Screen Recording DX* software to get the complete picture via synchronized voice and screen replay.

► **Reporting Engine DX**

The flexible *Reporting Engine DX™* option provides directors and managers with business intelligence to help determine necessary staffing levels and workflows, and to help justify budgets. Radio traffic, 9-1-1 and administrative phone activity can all be joined into actionable reports.

Reports can be generated on a schedule and delivered via email, PDF, or viewed in a browser. Custom reports can be designed from scratch or by starting from a wide range of pre-configured reporting blocks tailored to fit your needs.

► **Screen Recording DX**

The *Screen Recording DX™* option allows you to capture high-quality videos of workstation activity that can be seamlessly synchronized with recorder audio. Supervisors can benefit by obtaining a better understanding of each agent's compliance with required practices and protocols. *Screen Recording DX* can capture the important imagery appearing on a user's PC screen, such as surveillance camera video, maps, or overlay application video. Screen recording replay can also aid during incident investigations and can help to document issues with other software.

The *Screen Recording DX* software can efficiently capture up to 20 frames per second, offers flexible bandwidth-limiting options, supports multiple displays and is compatible with modern Windows and Linux workstations.

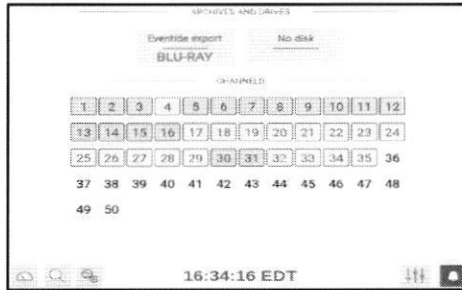

► **NexLog DX-Series Software Update Subscription (DXSUS)**

The NexLog DX-Series software continues to evolve in order to meet tomorrow's technical and security challenges, and new software versions and updates are produced on a regular basis. The *DX-Series Software Update Subscription (DXSUS™)* provides access to these important software versions and updates, which can incorporate Linux security updates, application-level security updates, and improvements to existing functionality. Each NexLog DX-Series software version is conveniently designated by its year of release, as well as its update level (example: "Version 2020.1").

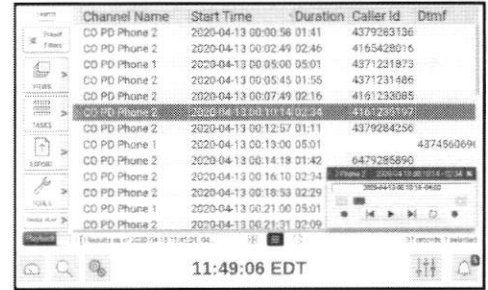

The first 12 Months of **DXSUS** coverage is included at no charge with the purchase of each DX-Series recorder, DX-Series virtual recording solution or Smart Edge Capture Device. *Yearly renewals of coverage will help assure that your NexLog DX-Series products maintain the highest levels of security, performance, functionality and supportability.*

► LCD Touch Screen

The optional 7" multi-touch LCD screen (on the front panel) lets you conveniently search and replay calls, protect calls, create incidents, export, burn to CD/DVD, live monitor, view alerts, view archive status, configure the NexLog DX recording system and more.

Info mode: Channels, Archives, Alerts, Live Monitor

Replay mode: Search, Replay, Build Incidents, Export

► Air Traffic Management and ED-137

NexLog DX-Series recording solutions can record all types of ATC/ATM audio sources, including controller working positions, VCCS, GRS, ambient audio, and telephones. NexLog systems fully support the ED-137B/C-Part 4 (VoIP) recording interface. Eventide actively participates in EUROCAE's Working Group 67 and the EUROCONTROL VOTE group.

► Synchronized Replay for ATC/ATM

NexLog DX-Series systems can directly record CWP screens and provide synchronized replay of both screen and audio. NexLog DX-Series recorders can also interface with Thales airspace navigation systems for synchronized replay of audio with CWP scenario replay. A DX-Series replay control API is also available.

► Redundancy

NexLog 740 DX-Series and NexLog 840 DX-Series recorders each include redundant power supplies and redundant disk drives. Redundant archiving options include NAS, Blu-ray/DVD-RAM, RDX, and removable HDD.

NexLog 740 DX-Series and NexLog 840 DX-Series recorders are available in sets of multiple units for fully redundant "Active + Active" recording, storage and archiving.

© 2020 Eventide Inc. Specifications and features are subject to change without notice. Some listed features are extra-cost options. Capacities are for DX-Series units. *Check with Eventide for mixed-type channel capacities, and for pre-sales review of digital phone, LMR, VoIP phone, and VoIP codec compatibility. **Location view & tracking functions require coordinates to be delivered to the recorder and require both Chrome browser and Google Maps.

June 7, 2023

Sheriff Tom Maddox
Sabine County Sheriff's Office
P.O. Box 848
Hemphill, Texas 75948

Dear Sheriff Maddox,

The DETCOG Regional 9-1-1 Network has funds available to allow the purchase of a recorder using funds included in the DETCOG Strategic Plan for **FY 2021** for 9-1-1 service delivery for the region. DETCOG has reviewed the proposed system offered by Vista Com and find the proposal to be consistent with the strategic plan and all applicable Commission on State Emergency Communications (CSEC) Rules.

DETCOG will reimburse Sabine County the maximum amount allowed by CSEC Rules (PPS 028: *9-1-1 Equipment Replacement*), based on your two position PSAP, which is not to exceed \$15,000 for your recorder replacement. Any, and all costs above \$15,000 will be the responsibility of Sabine County, which is \$17,538.

Sabine County is authorized to issue the appropriate purchase order consistent with Sabine County procurement policies and procedures. DETCOG will reimburse the county up to \$15,000 upon installation of the system and presentation of invoice from vendor and a photocopy of the check issued by the county to complete the transaction. In addition, DETCOG will pay up to \$3,000 for recorder maintenance fees annually for your recording system, provided funds are available.

Sabine County must issue their Purchase Order as soon as possible and have all recorder equipment installed no later than July 15, 2023. This will allow you time to submit your reimbursement requests with all supporting documentation to DETCOG before our CSEC deadline of August 1, 2023. After this date, funds **WILL NOT** be available for reimbursement to Sabine County and your county will bear the entire expense of the recorder replacement. The next available recorder replacement reimbursement opportunity from DETCOG is not scheduled until FY 2026, provided funds are available at that time.

If you have any questions or need additional information, please contact me at 936-634-2247, ext. 5252.

Sincerely,

Charlesetta Malone
