RE: WatchGuard Firewall and Router Renewal for Sabine County

Dear Mr. Roach,

Thank you for the opportunity to quote the renewal of your WatchGuard Firewall and Routers for Sabine County. The (2) WatchGuards that are in place have been an excellent Edge Network and Routing Solution for the County. WatchGuard has put together an excellent upgrade path to continue to offer the high-end protection for your needs.

Pricing is as follows:

WatchGuard T85 with 3 Years of Support and Software Updates:	\$ 3,285
WatchGuard T85 Failover Unit with (3) Years of Support and Software Updates	\$ 2,135

5420

I have attached a detailed brochure that documents the many features of the WatchGuard T85 for your review.

Please let me know if you need further information or if you have questions that we can address.

Thank you,

Bruce Love

FIREBOX T85

Up to 4.96 Gbps firewall throughput, 8 x 1Gb ports,
60 Branch Office VPNs

HIGH-PERFORMANCE SECURITY THAT EVOLVES WITH YOUR NETWORK

Businesses today are dependent on fast, reliable, and secure Internet connectivity, but struggle to find network security solutions that can keep up, let alone evolve as their needs change. Firebox T85 is one of the highest-performing tabletop appliances on the market and offers optional port expansion modules for integrated fiber connectivity, so you can adapt as your connectivity needs change.

"WatchGuard Firebox T Series firewalls offer a versatile security appliance that's well suited to deployments in home, and small to medium-size office environments. They offer a remarkable range of security features, intuitive management, and throughput your users need to keep up with the pace of business."

~ Dean Calvert, CEO, Calvert Technologies

TOTAL SECURITY, WHEREVER YOU NEED IT

Firebox T85 gives you a powerful tool for administering and enforcing policy across your extended network, allowing you to bring full UTM protection to small and midsize environments for tighter security. With full support for the Total Security Suite, T85 makes it possible to protect your smaller locations with advanced security services like Cloud sandboxing, AI-powered anti-malware, threat correlation, and DNS filtering.

QUICK AND SIMPLE DEPLOYMENT

Zero-touch deployment makes it possible to eliminate much of the labor involved in setting up a Firebox to connect to your network - all without having to leave your office. A robust, Cloud-based deployment and configuration tool comes standard with WatchGuard Firebox appliances. Local staff connects the device to power and the Internet, and the appliance connects to the Cloud for all its configuration settings.

Firebox T85 includes two Power over Ethernet (PoE+) ports to power a peripheral device allowing you to extend the reach of your network without running costly AC power to remote devices. With a port expansion bay, the T85 allows you to customize your port configuration with an SFP+ port for integrated fiber and LTE connectivity right from the appliance.

UNIFIED SECURITY PLATFORM® ARCHITECTURE

WatchGuard's Unified Security Platform framework is built from the ground up to enable a single console solution for provisioning, deploying, managing, and monitoring an integrated portfolio of advanced cybersecurity solutions and services. This comprehensive portfolio of endpoint, multi-factor authentication, Wi-Fi, and network security solutions (including Firebox firewall appliances) helps stop the attempted discovery and exploitation of vulnerable systems, phishing, ransomware, intrusions, and advanced malware across all users, environments, and devices. Our Unified Security Platform architecture replaces the old patchwork security approach and makes it possible to extend security capabilities to every computing environment where your business operates.

NETWORK OPTIMIZATION WITH SD-WAN

Firebox T85 makes network optimization easy. With integrated SD-WAN, you can decrease your use of expensive MPLS or cellular connections and inspect traffic from small offices while improving the resiliency and performance of your network.

FEATURES & BENEFITS

- 8 Gigabit Ethernet ports support high-speed LAN backbone infrastructures & gigabit WAN connections.
- Two Integrated PoE+ ports for powering peripheral devices.
- Adapt as your network evolves with optional SFP+ fiber and 4G/LTE port expansion modules.
- All logging and reporting functions included with purchase, with over 100 dashboards and reports including PCI and HIPAA.
