RE: DataPoint Cyber Security Solution for Sabine County

Dear Mr. Roach,

Thank you for the opportunity to quote DataPoint for your Cyber Security needs at Sabine County. As we have discussed, DataPoint is a leading-edge Cyber Security Platform offering the following features on all Windows PC's:

- Cyber Security Notification and Protection
- Anti-Virus Protection
- Backups of Critical Data to the Cloud or on Premise
- Remote Management and Monitoring
- Asset Management, Discovery, Detection, and Specification(s) Listing
- Windows Updates and Automated Workflows and Scripting.

We did a thorough review of all Cyber Security Platforms, prior to partnering on DataPoint. It is robust in features needed by any Information Technology Professional, and it offers a single "pane of glass" to handle the many complex needs in your field of supervision and responsibilities for the County. Further, it's priced right. We know you'll find it to be a great product experience, just as we have. I have attached a more detailed brochure for your review, as well.

DataPoint Monthly Costs	\$ 3.25 per device
One Time Installation Charge	\$ None
Estimated Monthly Costs (50 Devices x \$3.25)	\$ 162

Please let me know if you need further information or if you have questions that we can address further.

We appreciate the opportunity.

Sincerely,

Bruce Love

DATAPOINT

RMM, AV, EDR, Backups, Ransomware, & Automation – All in One

KEY FEATURES

- One product to manage, secure, backup, and automate all network devices.
- (20) Automated Workflows to save IT Staff Time:
 - Labor Intense items, made simple, reducing mistakes. Complicated tasks automated.
- Manage critical Network components in one easy to use pane of glass.
- Pre-built integrations and automations to save valuable time.
- Reduce software expenses when compared to using multiple solutions.
- Ransomware protection with (7) Day Rollback built in.
- Network Mapping for Devices

EXPANDED OVERVIEW

Remote Device Management and Maintenance (RMM)

- RMM to simplify IT operations for oversight of endpoints, networks, and cloud services.
- Real-time visibility of every asset documenting Status, Health, and Compliance.
- Keeps devices Secure, Patched, and Optimized through centralized, policy-based device management scaling to 1,000's of devices.
- Intuitive dashboards and reporting for a clear view of your Network, Staff's End-User support, service, and uptime.

Anti-Virus and Ransomware Security

- Anti-Virus: Protecting systems with leading-edge AV and malware protection.
- Endpoint Detection & Response (EDR): Enhanced security providing surveillance for real-time threat activity.
- Ransomware Detection: Proactive detection with built in workflow responses to any activity.
- **Pro Subscriptions:** Managed Detection & Response (MDR) to gain visibility into device attack pillars via Advanced Threat Protection with (10) Minute Response Times for critical events.

Backups

- Automated full backups, with incremental backup options.
- Protection against data loss while optimizing system performance.
- Encryption compliance features maintain data security and regulatory compliance.
- Easy to Use interfaces make maintenance simple.

- Detailed reporting and push notifications for visibility to backup health and integrity.

Automation

- True-Sync for EDR Policy: deploy updates faster with minimal clicks
- One-Deploy for Backup Install to reduce downtime for backup deployments
- SafeCheck for AV Activity with easy insight on alerts
